March 1 - 2021

RAK CERAMICS REVEALS RAK-VALET, A BATHROOM COLLECTION DESIGNED BY PATRICK NORGUET

Patrick Norguet is an essential figure in the international design scene. He has designed display windows of luxury brands Yves Saint-Laurent and Louis Vuitton, Renault's event stands and collaborated with Mc Donald's Global. His Rainbow Chair launched in 2000 catapulted his career to where it is today; an emblematic figure of French design.

Norguet's creative genius and RAK Ceramics' dedication to its quality birthed to RAK-Valet, a stunning bathroom project that gives a new perspective in using domestic spaces. Every element of the collection is in the service of the person who experiences the space.

The RAK-Valet collection is composed of functional elements – available in matt and glossy finishes – that serve as veritable valets and hand its users the objects for daily wellbeing via functional surfaces and stylistic solutions of significant visual impact. Decorative forms with slender profiles for the washbasins, top-notch stylistic research for the bathtubs, and elongated lines for the toilet bowls.

The collection will soon be available this 2021.
