# MAXIMUS

From the Largest to Every Detail. Maximus Redefines Surface Possibilities.

The timeless elegance of marble, the raw beauty of natural stone, the contemporary appeal of concrete, and the welcoming warmth of wood come together in perfect harmony. Experience the remarkable versatility of Maximus, designed to transform any living space into an exclusive and uniquely refined environment.

In a move set to redefine modern design, Maximus has introduced its expanded range of solutions, now available in striking 162x324 cm, 144x305 cm, 162x162 cm, 120x280 cm, 120x120 cm, 60x120 cm and 60x120 cm 20 mm. These new dimensions bring a blend of aesthetic sophistication and technological advancement to contemporary interiors, offering solutions for countertops, floors and walls. The Maximus surfaces are notable not only for their vast scale but also for their exceptional durability. Designed to endure even the harshest conditions, these tiles offer long-lasting beauty, making them ideal for both residential and commercial applications. The range includes surfaces with thicknesses of 20 mm, 14 mm, 12 mm, 9 mm and 6 mm, aligning with the latest design trends and professional needs.

## Versatility Meets Innovation

Maximus provides a versatile option for a variety of surfaces. Its substantial size and technical features make it suitable for porcelain stoneware countertops, large indoor and outdoor surfaces, and even as cladding for ventilated facades. This adaptability extends to bespoke furniture elements, such as bathroom and kitchen worktops. In today's design landscape, where versatility and durability are paramount, porcelain big sizes are gaining popularity. Their expansive format not only enhances aesthetic appeal but also ensures resilience. This combination makes them a preferred choice for contemporary spaces seeking both style and substance.

## A Canvas for Creativity

Maximus offers a broad spectrum of design possibilities. With options inspired by natural elements such as wood, stone, granite, and marble, these tiles provide a luxurious canvas for creative expression. Whether aiming for a serene, nature inspired look or a bold, modern statement, Maximus caters to diverse design preferences.

## Sustainability and Practicality

In addition to their visual and functional benefits, Maximus surfaces are an eco friendly choice. Crafted from premium materials like clay, silica, and quartz, they feature a dense core and a smooth surface. Their low water absorption rate of less than 0.5% makes them highly resistant to water damage, making them ideal for bathrooms and kitchens. Maintenance is another area where Maximus excels. Its large format reduces the number of tiles needed, simplifying cleaning and upkeep. It's robust surface is resistant to scratches and stains, ensuring long-term durability and ease of maintenance.

## Eco-Conscious Choice

Maximus surfaces also stand out for their environmental benefits. The use of natural raw materials and reduced resource consumption during installation contributes to a lower environmental impact. Their energy-efficient properties help regulate indoor temperatures, potentially reducing heating and cooling costs. In summary, Maximus presents an exceptional option for those seeking both beauty and durability in their design projects. With their impressive size, aesthetic flexibility, and sustainable attributes, they offer an ideal solution for transforming spaces with lasting impact.

“THE” COUNTERTOP

162X324 . 144X305 . 120X280

With 14 mm, 12 mm, 9 mm and 6 mm thickness options, Maximus countertops set a new benchmark for interior design. Perfect for kitchen surfaces, they naturally take center stage in both kitchen and living room layouts, from worktops to elegant dining tables. Their presence conveys strength and refined style, offering surfaces that enhance any space with seamless visual continuity and a rich tactile appeal.

Discover the perfect balance embodied in our porcelain stoneware surfaces, where the timeless beauty of marble meets the contemporary character of resin, concrete, and natural stone. Each texture is thoughtfully crafted to meet modern design demands, delivering furnishing solutions that are both visually striking and technically advanced. These surfaces elevate interiors, enabling the creation of exclusive, distinct, and sophisticated environments.

Celebrated for their outstanding performance, Maximus countertop solutions are non-absorbent, easy to clean, and completely safe, guaranteeing exceptional durability. Ideal for settings where strength and adaptability are essential, they are the perfect choice for those who value the seamless fusion of functionality and design.

## Scratch Guard

Long lasting love

A premium glazed polished surface finish, engineered for enhanced scratch resistance without compromising on gloss and elegance, specifically designed for Maximus. The polished surface features a highly scratch-resistant finish that provides exceptional durability against deep scratches, even from metal objects, making it one of the premium scratch-guard finishes available for porcelain surfaces.

## Flake Set

Flake Set technology seamlessly blends look of natural stone into tiles

The process starts by getting flakes from atomized color body powder. The flakes are blended with the raw clay, which is then molded and fired at high temperatures to ensure the flakes are evenly distributed and firmly set. Perfect for countertops and visible tile edges, FlakeSet technology redefines elegance by beautifully emulating the look of natural stone, now seamlessly integrated throughout the tile.

## RAK Sanit

Antibacterial solution for healthier environment

RAK-Sanit is a complete solution that includes porcelain and ceramic tile collections that reduce bacterial contamination and contribute to a healthier living and working environment owing to its antibacterial properties given by silver nitrate compounds.

RAK-Sanit antibacterial collection of wall and floor tiles features antibacterial technology that is permanently integrated into the tile surface. Once bacteria come into contact with the tiled surface, the silver ions initiate the elimination cycle. Silver ions in the antibacterial tile surface bind to enzymes, proteins, cell membranes, and the DNA of the microbe to damage DNA and block reproduction, resulting in the death of the organisms.

## 3D Shape

3D texture, surfaces, colour in unique materials

3D Shape is a structured effect created through the application of glue (a type of ink) and granules, synchronized with the design or random.

Glue & Granules can be applied either in combination with Digital Structure inks or independently. When glue and granules are used independently, the resulting surface effect delivers a pronounced, projected relief. When combined with digital structure inks, the final surface exhibits both the pronounced, projected relief with an added textured depth.

## Sync Effect

High definition structures using digital technology

Sync effect is a high definition digital structure technology. Digital Structure is a relief effect created using ink on the surface glaze or on the tile body surface. It involves a hydro-repellent activity developed with inks that can be synchronized with the design or can be done random, it always results in a textured depth on the surface.

## Absolute Matt

Extra matt surface with no glossy

Absolute Matt is the most recent innovation developed by RAK Ceramics R&D laboratories, which takes the concept of matt to new heights by enabling tiles to achieve an extra-matt surface; with zero reflection and a completely non-glossy finish. Absolute Matt enhances the tile's natural texture and durability, satisfying any design project's aesthetic and functional requirements.

# INNOTECH - LAB

Every solution within the Maximus range is created at Innotech Lab, a dedicated research and development hub where innovation drives every stage of design and production.

Innovation lies at the core of the Maximus philosophy, with a strong focus on pioneering high-tech breakthroughs that redefine industry standards. The brand is recognized for advanced porcelain surfaces designed for both indoor and outdoor applications, suitable for wall and floor coverings across residential, retail, and industrial environments.

Innotech Lab continuously develops new solutions and pushes technological boundaries through the use of state-of-the-art production technologies. These include advancements in extra-large format slabs, high-definition digital printing, anti-microbial and anti-reflective surfaces that are exceptionally pleasant to the touch, enhanced anti-slip performance, the latest high-definition digital structure technology known as Sync Effect, and highly natural 3D Shape technology extremely natural and well defined deepness of different levels of surface.

# CONCRETE

Maximus' concrete collections make a powerful statement with their sheer simplicity. No fuss, no frills, just pure perfection. Packed full of contemporary style, the concrete-effect big slabs are the ideal choice for creating a minimalist look and feel. The Maximus solutions are strikingly bold and beautiful, inspired by the simplicity and strength of industrial concrete.

**Massimo Bottura**  
3 Michelin Stars Chef

## *“Sometimes, evolution is invisible”*

The 3-star Michelin Chef Massimo Bottura, in the intimacy of his kitchen, tells us a revolutionary story, a story where what is “invisible” becomes visible and changes things. We are at Casa Maria Luigia, in the heart of the Emilian countryside, where flavors dance and passion is the real engine of extraordinary feats.

“The main concept that has driven my work over the last 25 years is evolving tradition. We cannot ignore flavours that have been distilled over centuries of history, but our kitchen is also a laboratory in which we observe, experiment, collaborate, and share, drawing inspiration from the team’s cultural biodiversity. When I think of the new CookingRAK top, the first thing that comes to mind is “beauty”. Natural materials, clean shapes, and straightforward lines. Creating “beautiful” things is extremely difficult, especially in the kitchen. You must create something that is functional for what you need to do while also being simple; this is the most difficult aspect. Technology, for example, is extremely important in kitchen. There is nothing without technology.”

CookingRAK is technology and design, it’s invisible and designed to give maximum emphasis to the preparation of dishes. But it is also an element around which people live and discuss and in Massimo Bottura’s kitchen, conviviality is extremely important.

“My entire childhood was spent huddled around a large dining room table with my five brothers, mom, dad, uncles and grandmothers. My passion for this profession stems from that sense of movement, the loud chatter, the confusion, and the sense of food as a bond. My family has grown today. My team represents my family and my future. When we reach out to people from different backgrounds and cultures, we share ideas and knowledge and grow together. Consider this beautiful, essential, natural surface on which you can cut, cook, clean, and eat all at the same time. You can have your team there, as well as guests and friends.”

CookingRAK is as revolutionary as the small but exceptional ideas. It’s invisible, like innovation, like genius. It’s simple, it’s beautiful, it’s social and it’s green, because it’s very careful about limiting waste and in the kitchen, wasting things is not allowed... much less energy. CookingRAK uses less energy than traditional electrical systems, without compromising the quality of the preparations. Externally there is beauty, inside there is innovation and creativity... invisible, but powerful, as something unexpected. Because sometimes evolution is invisible.

## Technical specifications 162x324 cm (12 mm) Porcelain Tiles (BIa - GL)

TEST DESCRIPTION	STANDARD TEST METHOD	STANDARD REQUIREMENTS	MAXIMUS SPECIFICATION
			Porcelain Tiles (12 MM) 162x324 CM
Surface Quality	BS EN ISO 10545-2	A minimum of 95% of the tiles are to be free from visible defects	Minimum of 95% of the tiles are free from visible defects
Length & Width	BS EN ISO 10545-2	± 1.0mm	± 1.0mm
Thickness	BS EN ISO 10545-2	± 0.5mm	± 0.5mm
Straightness Of Sides	BS EN ISO 10545-2	± 0.8mm	± 0.8mm
Rectangularity	BS EN ISO 10545-2	± 1.5mm	± 1.2mm
Surface Flatness: Centre Curvature	BS EN ISO 10545-2	± 1.8mm	± 1.8mm
Surface Flatness: Edge Curvature	BS EN ISO 10545-2	± 1.8mm	± 1.5mm
Surface Flatness: Warpage	BS EN ISO 10545-2	± 1.8mm	± 1.5mm
Water Absorption	BS EN ISO 10545-3	≤ 0.5%	≤ 0.4%
Breaking Strength*	BS EN ISO 10545-4	≥ 1300 N	≥ 2000 N
Modulus Of Rupture*	BS EN ISO 10545-4	≥ 35 N/mm <sup>2</sup>	≥ 40 N/mm <sup>2</sup>
Coefficient Of Linear Thermal Expansion	BS EN ISO 10545-8	Test method available	≤ 7X 10 <sup>-6</sup> /°C
Resistance To Thermal Shock	BS EN ISO 10545-9	Test method available	No visible defect
Crazing Resistance	BS EN ISO 10545-11	Required	No crazing
Frost Resistance	BS EN ISO 10545-12	Required	No visible damage
Resistance To Household Chemicals & Swimming Pool Salts	BS EN ISO 10545-13	Minimum Class B	Class A No visible effect
Resistance To Low Concentrations Acids & Alkalis	BE EN ISO 10545-13	Manufacturer to state classification	Min. Class LB (Matt) Class A (Polishes) No visible effect
Resistance To Staining (Natural)	BS EN ISO 10545-14	Minimum Class 3 (glazed) Test method available (Unglazed)	Min. Class 4 Stains removed
Resistance To Staining (Polished)	BS EN ISO 10545-14	Minimum Class 3 (glazed) Test method available (Unglazed)	Min. Class 3 Stains removed

Note: This technical specifications are applicable only to tiles in choice "A".

\* Test performed using 60x120 cm cut pieces from the slab.  
\* Thickness is nominal
