CERAMICS

About

RAK CERAMICS (BANGLADESH) LTD.

RAK Ceramics (Bangladesh) Limited is the country's largest and most respected tiles and sanitary ware brand. It's a joint venture entity between Bangladesh & UAE. It has converted into public limited company on 10th June, 2008 and listed in the stock exchanges of Bangladesh on 13th June, 2010. The core business of RAK Ceramics (Bangladesh) Limited is to manufacture and sell of tiles and sanitary wares. The company has over 1500 models active in the ceramic and porcelain tile business and regularly adds several new designs to the product portfolio. The company has over 50 models of exclusive range of sanitary ware to offer with a very wide choice. Our annual production capacities are 10.32 million SQM of tiles and 1.45 million pieces of sanitary ware.

RAK Ceramics (Bangladesh) Limited is an ISO 9001:2015 certified organization. We are maintaining our commitment to protect and preserve the environment by operating an Environmental Management System which is certified to ISO 14001:2015 standard. The Company complies with ISO 13006 (E), the latest international standard for ceramic tile; locally known as BDS ISO 13006:2021. The Company's sanitary ware complies with the quality criteria of BDS 1162:2014. Both tiles and sanitary products are BSTI-approved.

CERAMIC & VITRIFIED TILES

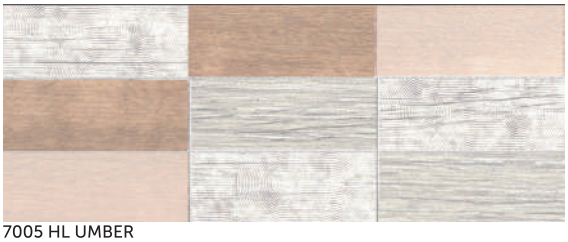

RED BODY AND WHITE BODY CERAMIC TILES

Red body and white body ceramic tiles are made with the finest quality clays with chamotte (a ceramic raw material with a high percentage of silica). These raw materials are submitted to dry grinding, suitably mixed, and then pressed with hydraulic presses. Quick-cycle support firing is obtained via roller kilns reaching temperatures of approximately 1100°C. After biscuit glazing, the vitrified product is sintered in a single-layer roller kiln at approximately 1030°C. The resulting wall tiles have an average bending strength higher than 15 N/mm² in accordance with the UNI EN ISO 10545-4 standard and a water absorption level higher than 10%; they belong to the BIII (GL) group according to the UNI EN 14411 standard. This class of products shows virtually no shrinkage during firing; therefore, such dimensional consistency results in extremely easy laying.

PORCELAIN TILES

Porcelain tiles are manufactured using pure, selectively imported raw materials mixed using the most advanced extraction and sorting techniques; they are obtained through a production process similar to that of single-fired tiles. The resulting product is top-quality porcelain tile, obtained by raw materials wet grinding, followed by partial drying by spraying, silo storage to allow homogenization of properties, and pressing with highly efficient hydraulic presses up to a specific pressure of more than 500 kg/cm². The high pressure combined with high firing temperatures exceeding 1200°C results in a highly compact, strong ceramic surface with very low water absorption (lower than 0.1% according to UNI EN ISO 10545-3) and extremely high mechanical resistance (average value exceeding 50 N/mm² according to UNI EN ISO 10545-4). Thanks to their low porosity, these porcelain tiles are frost-proof and rated as belonging to the BIa GL class according to the European Standard UNI EN 14411, which requires water absorption ≤ 0.5%. The MoR (modulus of rupture) in accordance with UNI EN ISO 10545-4 results in 50 N/mm², while the required value is 35 N/mm². RAK Ceramics porcelain tiles are available in a wide range of designs, sizes, and finishes.
