RAK CERAMICS PARTNERS UP WITH AZIZI DEVELOPMENTS FOR THE RIVIERA PROJECT IN MBR CITY

RAK Ceramics to supply tiles and kitchen and bathroom fittings to 26 developments in Azizi's Riviera waterfront project in Dubai.

The French- Mediterranean inspired waterfront project by Azizi Developments, a leading private developer in UAE, Riviera will be developed with RAK Ceramics premium products, its large format tile Maximus Mega Slab as well as its latest porcelain tile collection.

Aiming to create a modern luxury property befitting of Riviera's remarkably high-quality standards, Azizi selected a combination of a nature-inspired collection of marble, stone, concrete, and wood effect porcelain tiles as floor and wall coverings. The bathrooms will be fitted with Shine stone series while the living spaces will take a contemporary style with wood effect porcelain tiles. For a durable and versatile option, balconies will be covered with concrete effect tiles and the corridors with Aleppo series, a digitally printed stone-effect tile that gives off a rustic feel. And for a luxurious and stylish kitchen and countertop, Azizi chose Maximus Mega Slab in marble to cover the surfaces.

This partnership of two UAE local brands RAK Ceramics, and Azizi Developments, is proof of the strength of both companies in the field of ceramic industry and property development, respectively.
