

## Tiles COUPLED to Enhance the Look of the Interiors

In earlier days, decorating the interiors meant painting it with neutral colours. However, modern times have called for introducing contemporary styles for adorning the living space to achieve the desired look. The transition from light-toned colours to intricate patterns, from wall painting to opting for wall tiles, we have come a long way.

Many are slowly but steadily opting for placing wall tiles rather than painting the walls as they are long-lasting, resistant to dirt and dust and do not lose lustre. Moreover, interior designing has taken a giant leap as there are an array of styles, patterns and designs that are available in the market and everyone is spoilt for choices. Amidst the chaos, it is a challenge to choose the right look that complements the appearance of the interiors. Whether you go bold with striking patterns or settle for something subtler for your home, it is crucial, that the selection of tiles must go along with the flooring to create an impressive ambience. The similar colour scheme throughout the room to achieve the continuous flow or contrasting patterns to boost visual interest, proper selection of colours is essential.
