RAK CERAMICS WINS ARCHIPRODUCTS DESIGN AWARD 2026 FOR DUNE WIND

RAK Ceramics has won an Archiproducts Design Award 2026 in the Finishes category for Dune Wind, adding another international design accolade to its achievements.

Inspired by desert dunes shaped by the wind, Dune Wind combines refined textures, delicate reliefs and sand-inspired tones. Its surfaces capture the natural movement of dunes and their interaction with light, bringing warmth and understated elegance to contemporary spaces.

The Archiproducts Design Awards celebrate excellence in international product design, recognising originality, research and innovation. This recognition reinforces RAK Ceramics' commitment to exploring new design possibilities and translating natural inspiration into distinctive architectural surfaces.
